Are you a veteran who needs support to live independently and safely at home?

At Amada Senior Care, we advocate for senior veterans by helping them apply for and receive VA benefits. Amada has been vetted and approved by your VA-sanctioned Community Care Network to provide in-home caregiving services.

What can VA home care benefits be used for?

- In-home caregivers / companions
- Adult day care
- Skilled care / nursing homes
- Board and care residences
- Assisted living communities
- Respite care for families

"These benefits so often are a complete surprise to senior veterans and their families! They can't believe there's VA financial assistance that can help pay for in-home care or for an assisted living community."

AMADA SENIOR CARE™

Understanding VA Benefits for Home Care

Let Amada Be Your Dedicated Advocate

Did you know certain VA benefits can be used to help cover the cost of in-home care? Three main benefits are available to qualifying senior veterans OR their surviving spouse.

BENEFIT #1:

Aid and Attendance

Provides additional funds to a qualified veteran's or a surviving spouse's monthly VA pension to help cover the cost of in-home care.

Who qualifies?

VA Aid and Attendance

- **Military:** Veteran must have served 90 days of active duty (two years of active duty for Persian Gulf service), with at least one of those days during wartime.
- **Medical:** Must need assistance with activities of daily living - like bathing, dressing, grooming, walking, meal preparation, eating, etc.
- **Money:** Must be spending the majority of income on care expenses.

BENEFIT #2:

Homemaker / Home Health Aide (HHA)

Helps veterans remain safe and independent while continuing to live in their own homes. A trained home health aide or homemaker goes to the veteran's home to support activities of daily living, like bathing, dressing, grooming, walking, meal preparation, eating, etc., as well as companionship. The HHA or homemaker is contracted through a non-VA provider, which typically is a home care agency.

Who qualifies?

- Vet is enrolled in a VA medical benefits package.
- Has confirmed eligibility for community-based care services.
- Have a doctor's order to receive home care services.

***At Amada,* we have years of experience working with VA-accredited partners who help determine a veteran's eligibility for benefits through a free consultation. Together, we are dedicated to assisting veterans identify and utilize the benefits they have earned.**

BENEFIT #3:

Respite Care

Pays for care for a short time period so family caregivers get a break and can run their own errands or seek their own medical care. Depending on the veteran's location and available services, respite care may include home visits by a home health aide, attendance at an adult day care program, short-term stays in a community living center/VA nursing home, or short-term stay at an in-patient VA medical center.

To receive VA respite care, a veteran must:

- Be enrolled in a VA health care benefits package
- Need assistance with activities of daily living or have a chronic illness or condition that requires a level of professional care.
- Typically priority is given to older veterans (aged 75 and up) or to vets with a greater financial or health need.
